引言 Introduction

GS1是一個中立及非牟利的國際組織，一直致力設計及推行全球標準，務求讓供應鏈更加高效、透明及安全。其標準不但受ISO認可，並受多個國際機構認同，如GFSI。GS1全球追溯標準(GTS)符合多項國際標準，不論食品生產過程中牽涉多少不同企業和國家，該標準讓食品追溯系統可以全球通行。

近年的食物安全事故令市民大眾對食物安全日益關注，端到端的食物溯源系統成為食品安全管理不可或缺的元素。GS1 Hong Kong一直致力推動企業實踐食品追溯，由2015年開始均每年舉辦「優質食品計劃」(原名為：優質食品源頭追蹤計劃)。計劃旨在嘉許於食品安全上表現卓越的本地企業，包括透過有效地採用國際標準及監控食品管理系統技術，以達到食品追溯的要求和提供優質及安全食品予消費者的最終目標。

As a neutral, not-for-profit, standard organisation. GS1 has dedicated ourselves to the design and implementation of global standards, for more efficient, visible and safer supply chains. The global standards are not only recognised by ISO, but also widely acknowledged by global organisations like GFSI. GS1 Global Traceability Standard (GTS), which complies with multiple international standards, makes food traceability systems possible on a global scale-regardless of the number of companies or borders crossed in the food production process.

The outbreaks of food incidents in recent years raised concerns on food safety. End-to-end food traceability has become an essential element in food safety management. To encourage enterprises to adopt food traceability practices, GS1 Hong Kong has been organising the "Quality Food Scheme" (formerly named as Quality Food Traceability Scheme) annually since 2015. It aims to improve the visibility of food supply chain and enhance enterprises' ability in traceability, hence to increase consumer trust and food safety in local food industry.

由2020年9月起，GS1 Hong Kong推出了加強版「優質食品計劃+」。此計劃加入香港通用檢測認證有限公司 (SGS Hong Kong) 為審計夥伴。SGS 為全球在檢驗、查證、測試和驗證服務的領導者。透過加入食品安全管理體系和控制標準，我們冀以更全面的方法去幫助企業有效地優化及保障食品安全。

Starting from September 2020, GS1 Hong Kong launched an advanced edition - "Quality Food Scheme +" which the scheme invited SGS Hong Kong as an audit partner. SGS is the world's leading inspection, verification, testing and certification company, which is recognised as the global benchmark for quality and integrity. Taking reference from food safety management and control standards, we aim to help companies ensure food safety in a more comprehensive and effective way. Providing safer food to the consumer.

HACCP

ISO 22000是一個國際認證標準，其中定義了食品安全管理體系的要求。它結合公認的關鍵元素，以確保從食品鏈至最後消費點的食品安全。並適用於所有組織、可貫穿整個供應鏈—從農作者至食品服務、加工、運輸、儲存、零售和包裝。

ISO 22000 is an international certification standard that defines the requirements of the food safety management system. It integrates a number of widely recognised key elements, to ensure control over food safety activities from food initiator to the consumer final touchpoint. It applies to all organizations and can run through the entire supply chain – from farmers, food service, processing, transportation, storage, retail and packaging.

HACCP是危害分析和關鍵控制點(Hazard Analysis and Critical Control Point)的英文縮寫簡稱。HACCP是目前世界各國認定最佳的食品安全控制方法，強調事前監控勝於事後檢驗，主要為降低危害而設計，以有系統的方式確認危害，並加以評估、控制及監測任何製造過程，使危害得以預防、去除或降低到可接受的程度。

HACCP is the abbreviation of Hazard Analysis and Critical Control Point. HACCP is currently recognized as the best food safety control method in various countries in the world. It emphasizes that pre-monitoring is better than post-testing. It is mainly designed to reduce hazards, identify hazards in a systematic manner, and evaluate, control, and monitor any manufacturing process to make sure hazards be prevented, removed or reduced to an acceptable level.

高效回應消費者指標 ECR Index *

為了提高企業處理事故之速度和能力，本計劃同時加設了另一個元素—高效回應消費者指標。指標主要參照全球高效消費者響應指標 (Global ECR) 製訂，讓企業根據關鍵評分指標(KPI)對供應鏈執行效率進行更深一層的指導和評析，以了解公司內部和合作夥伴的ECR執行能力。指標內容將根據4大項目及4項準則進行。

In order to improve the speed and capability of companies to deal with incidents, the scheme has added a ECR Index. The Index is developed according to the Global Efficient Consumer Response (Global ECR) which provides companies with a deeper evaluation on the capabilities according to the KPI about the implementation of supply chain’s efficiency of ECR. The Index comprises 4 focus perspectives and 4 criteria.

連續三年獲「優質食品計劃」獎項的唐順興家禽（香港）有限公司、其總經理唐振峰亦對新計劃表示支持：「唐順興為香港和澳門主要冰鮮家禽入口商，亦有10間燒味食肆，自然亦非常重視食品安全。計劃不但肯定了我們的努力，更啟發我們訂立更高目標，進一步提高信息的透明度，令我們非常自豪。今年我們會多行一步參加新計劃，更全面審視食品安全管理體系和事前監控準備，提升食品安全管理。」

As a major importer of chilled poultry in Hong Kong and Macau with 10 siu mei restaurants, food safety has always been our focus. The Scheme not only recognised our efforts, but also inspired us to set higher goals, such as enhancing information transparency. We have decided to step up to join the new Scheme, to allow more extensive review on our food safety management and pre-monitoring system, which I believe will elevate our standard in that regard.

參加此計劃有助建立更高效的團隊和追蹤體系。在現今科技發展當中，食品生產過程之中的可追蹤性非常重要。食品在加工時候由於涉及很多人為操作，透過參加這個計劃和合作，便可以不斷提升系統科技和硬件更新。

Through the scheme, it helps us enhance communication of the team and establish a more effective traceability system. With the rapid technological development, traceability is important in the production process. As the food processing involves manual operation, by joining the scheme, we can continuously enhance our technological and hardware system.
