

**Supply Chain Certification Course:
Embrace 「Supply Chain 4.0」 with Automation & Digitalisation**

供應鏈認證課程：

通過自動化及數碼化應用迎接「供應鏈 4.0」

大量生產及自動化系統工業時代已經漸漸普及，隨著顧客對產品的主導性不斷增加，令消費模式轉為需求導向。這樣的模式也導致企業的供應鏈流程日益複雜化，整體成本逐年提高，是目前許多業界困擾的經營難題之一。供應鏈的數碼化和自動化使公司能夠滿足客戶的新要求，供應方面的挑戰以及提高效率期望。數碼化和自動化帶來了供應鏈 4.0 一切將會更快、更靈活、更仔細、更準確、及更高效。

供應鏈 4.0 原意套用了 工業 4.0 之新元素 – 利用物聯網，高端科技之機器人，分析和大數據 – 以應用於快速啟動性能和客戶滿意度。

In the past, the industrial era of mass production and automation systems has become popular. With increased customer expectation, the market has turned into demand-driven. Unfortunately, this new trend of production increased the complexity of manufacturing process for enterprises, which increases the supply chain cost every year. This is also one of the problems that many industries are currently plagued. The digitalisation and automation of the supply chain enables companies to address the new requirements of the customers, the challenges on the supply perspective as well as the remaining expectations in efficiency improvement. Digitalisation brings about a Supply Chain 4.0, which will be faster; more flexible; more granular; more accurate and more efficient.

In **Supply Chain 4.0**, supply-chain management applies Industry 4.0 innovations—the Internet of Things, advanced robotics, analytics, and big data—to jump-start performance, and customer satisfaction.
