- Dr. Bruce CHONG, Associate (Sustainable Infrastructure Design Leader), **Ove Arup & Partners Ltd**
- Ir. Peter YEUNG, Head of ICT, Smart City and Green Tech, **Hong Kong Science and Technology Parks Corporation**
- Mr. Ivan CHAN, Managing Director, **Accenture Digital Transformation Lead, Greater China**

## Quotes from 2017 Guests

### Ir. Allen YEUNG, JP

Government Chief Information Officer

As Hong Kong developed into a smart city, IoT will be widely deployed and exploited to provide real time information for government to manage the city.

### Hon. Charles MOK, JP

Legislative Council Member

I think in the coming 3 years, there will be even more companies coming to Hong Kong from all around the world to use Hong Kong as a base to work with the Chinese partners to work with these smart hardware, IoT hardware and cert systems.

### Mr. Andy BIEN

Chief Information Officer, Airport Authority, Hong Kong

With Hong Kong wanting to be a smart city, with the new blue print published by the Government, we are expecting to see more smart enablement within the city infrastructure. Speaking from the airport perspective, we definitely want to be a smart airport.

### Mr. Shounak MONDAL

Vice President, Campaign, Schneider Electric

The Conference has been very good because it gives us the opportunity to understand IoT perspective from different industries applied to different segments. It is also good to network and exchange ideas of some challenges and new use cases others are seeing across industries.

### Mr. Ronald PONG

CEO, Nexusguard

I think it is a very successful conference because this conference really can group a lot of different people with different expertise on difference areas and share our experience and thoughts about the development of IoT.

### Dr. Bruce CHONG

Associate (Sustainable Infrastructure Design Leader), Ove Arup & Partners Ltd

The Conference is very fruitful and also beneficial to a person like me with an engineering background. The ICT professionals today share with us quite a lot of real applications on shopping, retail and also supply chain applications which is very useful to city planning as well.

## GS1 Hong Kong's Role in Championing IoT
